

# KEY STAGE THREE CURRICULUM KNOWLEDGE AND SKILLS MAPPING TOOL

SUBJECT: Design Thinking

	KNOWLEDGE	SKILLS
<b>YEAR 7</b>	<p><b>Key Fob</b></p> <p><b>Design</b>                      Use research and exploration the key fob, to identify and understand user needs.                      Identify and solve their own design problems and understand how to reformulate problems given to them.                      Develop specifications to inform the design of innovative, functional, appealing key fobs that respond to needs in a variety of situations.                      Use a variety of approaches, to generate creative ideas and avoid stereotypical responses.                      Develop and communicate design ideas using annotated sketches.                      Modelling design concepts to understand success criteria.</p> <p><b>Make</b>                      Select from and use specialist tools, techniques, processes, equipment and machinery precisely, including computer-aided manufacture.                      Select from and use a wider, more complex range of materials and components, taking into account their properties.</p> <p><b>Evaluate</b>                      The use and environmental impact of plastics.                      Investigate new and emerging technologies.                      Test, evaluate and refine their ideas and products against a specification, taking into account the views of intended users and other interested groups.                      Understand developments in design and technology, its impact on individuals, society and the environment, and the responsibilities of designers, engineers and technologists.</p>	<ol style="list-style-type: none"> <li>1. I have set targets/specification to achieve with my practical</li> <li>2. I have created a recognisable design</li> <li>3. I have created a suitable shape</li> <li>4. I have created a relevant shape for user</li> <li>5. I have used the material economically</li> <li>6. I know about the impact of the materials I am using</li> <li>7. I can transfer an accurate shape onto material</li> <li>8. I have cut allowing space for if I go wrong (tolerances)</li> <li>9. I can cut across the edge (90°s)</li> <li>10. I can use the vice correctly</li> <li>11. I can use coping saw correctly</li> <li>12. I can correct problems independently</li> <li>13. I can use the file effectively</li> <li>14. I can use the emery paper</li> <li>15. I have made independent choices</li> <li>16. I have used quality control tests</li> <li>17. I can always work safely</li> <li>18. I can use the buffer safely and successfully</li> <li>19. I can use the drill safely and accurately</li> <li>20. I know health and safety rules</li> <li>21. I can use 2D design independently</li> <li>22. I can use 2D design creatively and accurately</li> <li>23. I can test and modify my design</li> <li>24. I can use laser cutter effectively, safely and independently</li> <li>25. I have tested my product and it works</li> <li>26. I have kept an accurate diary of the manufacturing process</li> <li>27. I have judged my final key fob against my original targets</li> </ol>

<b>YEAR 7</b>		<b>First Half Term</b>	<b>Second Half Term</b>
	<b>Content</b>	Key fob	Key fob
	<b>Skills</b>	1 - 13	13 - 27
	<b>Assessment</b>	<p>Written test – Knowledge based (50%)</p> <p>Folder and practical – point score based on descriptors (50%)</p> <p>Monthly 'skill and safety review'</p> <p>Half termly Homework Menu</p>	<p>Written test – Knowledge based (50%)</p> <p>Folder and practical – point score based on descriptors (50%)</p> <p>Monthly 'skill and safety review'</p> <p>Half termly Homework Menu</p>

	KNOWLEDGE	SKILLS
<b>YEAR 8</b>	<p><b>Architecture – Formbyville</b></p> <p><b>Design</b> Use research and exploration to understand architecture and interior planning. To investigate a town plan, to identify and allocated the buildings needed. Consider the function of building and the lay out and plan of the interior. Identify and solve their own design problems and understand how to reformulate problems given to them. Develop specification to inform the design of innovative and functional building. Use a variety of approaches, to generate creative ideas and avoid stereotypical responses. Develop and communicate design ideas using annotated sketches, detailed plans, 2D and 3D CAD software. Also including scale and mathematical based working drawings. Modelling, oral and digital presentations and computer based tools.</p> <p><b>Make</b> Select from and use specialist tools, techniques, processes, equipment and machinery precisely, including computer-aided manufacture. Select from and use a wider, more complex range of materials always taking into account their properties.</p> <p><b>Evaluate</b> Analyse the work of past and present professionals and others to develop and broaden their understanding. Investigate new and emerging technologies. Test, evaluate and refine their ideas and products against a specification, taking into account the views of intended users and other interested groups. Understand developments in design and technology, its impact on individuals, society and the environment, and the responsibilities of designers, engineers and technologists.</p>	<ol style="list-style-type: none"> <li>1. I can research and identify information to develop my thinking</li> <li>2. I can set targets to achieve - specification</li> <li>3. I can design for a suitable for function</li> <li>4. I can design for a suitable for user</li> <li>5. I can investigate designers and use this information to influence</li> <li>6. my ideas</li> <li>7. I can develop alternative proposals</li> <li>8. I can evaluate my own work to develop my ideas further</li> <li>9. I can draw accurately to scale</li> <li>10. I can use 2D design with confidence and precision</li> <li>11. I can use different drawing skills to communicate my ideas</li> <li>12. I can use CAD both to sketch and produce final ideas</li> <li>13. I can model in CAD</li> <li>14. I can understand, work with and convert measurements and scale</li> <li>15. I can use CAD software confidently and independently</li> <li>16. I can test and modify my own design as needed</li> <li>17. I can use the 3D printer independently</li> <li>18. I have kept an informative and well-presented diary of this whole process</li> <li>19. I have evaluated my final design against the original specification</li> <li>20. I can formally present my final idea to the class</li> <li>21. I have contributed to Formby-Ville with my unique and creative building design</li> </ol>

<b>YEAR 8</b>		<b>Autumn 1</b>	<b>Autumn 2</b>
	<b>Content</b>	Architecture	Architecture
	<b>Skills</b>	1 - 14	15 - 21
